Ordering spare parts

Each spare part can be identified by matching the figure number with its corresponding ordering code and designation. Please take notice that certain parts are not suitable for all design versions. The parts list unambiguously denotes which parts belong to a certain design version. Unless otherwise stated in the parts list or requested by the customer, the given quantity for each spare part is 1. Parts kits contain several loose parts. The parts contained in each kit are marked with the same position number in the exploded view.

When ordering, please indicate the **complete ordering code** with the **designation** as well as the **quantity**. Only then is it possible to deliver the desired spare parts rapidly and without error.

The figures shown may deviate from the actual part version. We reserve the right to make alterations without notice.

Please direct your orders to your local Avery Dennison sales partner

Availability of spare parts

Each spare part is assigned to one of four categories, depending on the forecasted demand of the part. Each category has a different shorthand, which is put down on top of the appropriate column of the spare parts chart.

Cat.	Shorth.	Meaning	Delivery time
1	WP	Wear part	24 hours
2	RSP	Recommended spare part	24 hours
3	SP	Spare part	24 hours
4	--	Spare part on request	

Fixed L-shape dispensing edge
